

Artificial Intelligence

Session ID: 578297c5 | Generated: 2026-07-18 20:24:18 | Detected: English | Target: HINDI

Summary

Artificial Intelligence is the simulation of human intelligence by machines. Deep learning is a subset of AI based on neural networks.

Key Points

- Deep learning is a subset of AI based on neural networks.
- Artificial Intelligence is the simulation of human intelligence by machines.
- It involves learning, reasoning, and self-correction.

Keywords & Relevance

Keyword	Relevance	Keyword	Relevance
intelligence	0.24	learning	0.22
correction	0.16	involves	0.16
reasoning	0.16	self	0.16
ai	0.13	based	0.13
deep	0.13	networks	0.13
neural	0.13	subset	0.13
artificial	0.12	human	0.12
machines	0.12		

Translation (HINDI)

आर्टिफिशियल इंटेलिजेंस मशीनों द्वारा मानव बुद्धि का अनुकरण है। इसमें सीखना, तर्क करना और आत्म-सुधार शामिल है। डीप लर्निंग तंत्रिका नेटवर्क पर आधारित एआई का एक सबसेट है।

Exam Questions & Answers

Fill in the Blanks

Q: _____ Intelligence is the simulation of human intelligence by machines.

A: Artificial

Q: Deep _____ is a subset of AI based on neural networks.

A: learning

Q: It involves _____, reasoning, and self-correction.

A: learning

True or False

Q: True or False: Artificial Intelligence is not the simulation of human intelligence by machines.

A: False

Q: True or False: Deep learning is a subset of AI based on neural networks.

A: True
